¿Y estos filtros?

Los filtros para muestreo (*sampling*) computan nuevos *datasets* que representan características esenciales de los datos de entrada.

Algunos son:

satisfy your needs, ParaView provides a mechanism to add new modules via plugins. Conventional plugins, however, are intended for hardcore developers. They are written in C++, using the data processing APIs provided by ParaView and VTK. The complexity of building and packaging C++ plugins that work on all distributed versions of ParaView can be
